١. Program Vision

The vision of the department is to work on developing a strategy that deals with:

First: Teaching students Islamic sciences and focusing on the science of jurisprudence and its principles with attention to mental, legal and educational sciences.

Second: Working to know the jurisprudence of disagreement and its impact on spreading the culture of tolerance, containing the violator and recognizing rights and duties in accordance with the general legal controls, in light of a charged global atmosphere that prevents listening to the rich and diverse ideas that others are supposed to understand, without the need to adopt them.

Third: Showing the values of moderation and moderation in dealing with others in accordance with the controls set forth by Islamic Sharia and being the standard through which it can be dealt with.

٢. Program Mission

١- Showing facilitation in Sharia rulings through the study of jurisprudence and its principles, through which the flexibility and originality of Islamic legislation appear.

٢- Qualifying cadres specialized in teaching subjects related to Sharia sciences (jurisprudence and its principles).

٣- Seeking to communicate with other scientific and cultural communities by holding conferences, seminars and scientific workshops in a contemporary manner electronically or in person.

٤ - Realizing the greatness of this religion and the fact that it is valid for every time and place and that it came to achieve the interests of people within the purposes of the general Sharia.

٥- Explaining the role of the Department of Jurisprudence and its principles in finding solutions to the problems experienced by society.

٦- Linking the present of the Islamic Ummah with its past by glorifying the legal texts.

٧. Program Objectives

- ١- Calling for tolerance, establishing the values of difference and respect for others.
- ٢- Spreading the culture of peaceful and societal coexistence, establishing rules for dialogue, and avoiding everything that would harm the national unity of society.
- ٣- Consolidating the critical mentality of dialogue, overcoming the closed static mentality, and addressing the causes of difference.
- ٤- Understanding contemporary calamities and clarifying their jurisprudential rulings in accordance with Sharia controls.
- ٥- Emphasizing the correct understanding of religion in the light of a moderate approach, and staying away from intolerant and aggressive sayings, ideas and attitudes.
- ٦- Revealing the positive impact of the correct understanding of Islamic jurisprudence and its impact on sustainable development.
- ٧- Providing the community with scientific cadres specialized in the field of boys.
- ٨- Manifesting the rational, moral, humanitarian, aesthetic and moral dimensions of jurisprudence and its principles.
- ٩- Education on the observance of freedoms and human rights, and everything that enhances human dignity as one of the foundations of Sharia and its provisions.
- ١٠ - Study the difference of jurists and explain its impact on pushing fanaticism and containing the violator.
- ١١- Opening channels of scientific cooperation with the corresponding scientific institutions at the local and international levels.

Professional Development

Mentoring new faculty members

The scientific department in the strategy of directing new faculty members has a special curriculum by stating the vision, mission and objectives of the college and the department, especially the new employees, and developing an appropriate mechanism that can develop

their own faculties.

Professional development of faculty members

One of the axioms of the scientific department in the professional development of faculty members is to set a schedule in which training courses and workshops as well as seminars are specified, all of which would increase the ability and professional quality of faculty members.

9. Acceptance Criterion

Through the channels of special admission and central admission.

10. The most important sources of information about the program

- Academic websites
- Books of jurisprudence and its principles .
- Scientific studies .

11. Program Development Plan

Teaching Staff

- Contribute to the development of the efficiency of teachers in the department in line with the development of the humanities
- Contribute to providing universities, colleges and various institutions with scientifically qualified graduates who hold master's and doctoral degrees.

Learners

- Attention to providing learning opportunities and acquired experiences that develop students' abilities and orientations.
- Using new concepts in the field of forensic sciences and using electronic devices to display information and issues when necessary.

Teaching and Learning Strategies

The most important strategy that the professor focuses on is the communicative method in teaching language, that is, focusing on the meaning of the grammatical concept presented to the student before addressing its form and structure in order for the student to believe in its importance and imagine the situations and contexts in which it can be used. And then comes the proposal of structure or formula and law.
